

Fall 2023 Hydrant Flushing

Hydrant Flushing and maintenance will begin late September and will end by approximately mid-November. A robo call will be made to your registered phone number through the Town of North Hempstead's Swift 911 program when hydrant flushing takes place in your area. Now is the time to register if you not previously done so. Go to www.northhempsteadny.gov and follow the prompts to the Swift911 Portal. Please be advised, you may experience discoloration or rusty water from your faucets. If rusty water occurs, please run your taps 10 to 15 minutes to clear the rust. Running your washing machine before doing a wash is also recommended. We apologize for any inconvenience. If you have any questions, please call our office at 516-333-0540.
